La nostra Associazione, sempre alla ricerca di nuove località ove svolgere il proprio Congresso, è finalmente approdata in Puglia, una delle più belle regioni, ed in particolare a Torre Canne dove termina la Valle d'Itria, nei pressi di Ostuni "la città bianca".

Tutta l'area è apprezzata per bellezza della sua natura, le spiagge pulite a ridosso di riserve naturali, si trova nel cuore della Puglia, al confine della zona dei Trulli e all'inizio del Salento.

Il Congresso un pretesto da non perdere per poter visitare meravigliose località della nostra bella Italia, a tanti sconosciute, unisce all'occasione di un incontro il piacere di una indimenticabile scoperta.

***O**ur Association, always looking for new places where to hold the annual Convention, this year found hospitality in Puglia, one of the most beautiful regions in Italy and particularly in Torre Canne at the edge of the Valle d'Itri, closeby Ostuni "the white city".*

The whole area is lauded for its natural beauty, the clean beaches of the coast nearby nature preserves and is located in the heart of Puglia, at the fringe of the trulli zone and the beginning of the Salento.

The Convention offer us an excuse to visit one of the hidden jewels of our beautiful Italy, and combines the occasion of a meeting to the pleasure of an unforgettable surprise.

**In good
hands
with
B&S**

We are B&S and with over 145 years experience in the maritime industry, we know how the market operates. We deliver a full range of Provisions, Bonded Stores and Cabin Stores to ship chandlers globally. Our single-source-supply concept maximises efficiency and provides

clients with the most cost-effective solutions. We are a specialised distributor, contract partner and Duty Free retailer in niche markets worldwide. We fulfill an essential role in the supply chain, linking suppliers and customers that would otherwise find it difficult to connect.

Pneumatic Rubber Fenders Foam Filled Fenders Sale, Rent & Maintenance

FENDERS TECHNOLOGY

- Anti Rotation Device
- Pressure/Position Detectors
- Repair and protection, reconditioning
- Fenders Special Mooring Ropes for FPSO

Pneumatic fenders features

This is ideal in situations where the fixed fender is not applicable such as ship to ship operations, off-shore, and some ship-to-wharf operations. It is also suitable for the use on quay where the tidal range is large.

Like the hollow cylindrical fender, its initial reaction load is low at the early stage of compression and its cushion effect is virtually independent of approaching angle of ship.

Pneumatic fenders are made of double layer of superior rubber.

Foam Filled Marine Fenders

A superior external chain and aircraft tire net constructed exclusively with aircraft tires, heavy-duty rubber tubing and chains that are connected at every intersection with a shackle. This is the key element in the Ocean Cushion, un-surpassed strength and resilience.

The Ocean Cushion, skin is constructed of tough and thick nylon filament reinforced polyurethane skin.

The skin also has a nylon tire cord applied in a helix pattern during the coating that embeds the filament into the skin.

This advanced process makes the Ocean cushion, skin extremely durable to all weather, forces and marine conditions.
